WR ITING ON S CREEN

If their is a hierchy in this universe that is defined and prescribed by ones own self merit, worth of iq, and emotional capacities , then I believe truly I would certainly indeed lie vastly ahead , above and below you in perspective of the loser.

That being said, and if truth lies in the totality only or parts not mentioned inclusive and addend-able within respectable boundaries ,then why is it that women sabotage men's intellectual growth and studious dynamic thinking along with healthy emotional capacitance exercises?

EXT. ROOFTOP -NIGHT- OHM CITY – MOON and GARGOYLE in shot.

[Jim standing arms crossed holding his elbows staring off over the rooftops horizon of Ohm’s skyline behind ,glow of electric burn-off unit and roof top sign creeping in from just off camera]

Internal monologue;

How am i supposed to rob the bank vaults throughout all the state banks and first trust vaults when they are lying empty and open in American city’s throughout this country displayed open in converted department store displays ,storefronts and other establishments i frequent.

Where the fuck is all the platinum and geodes? Why are all the crates of art in the Vatican and the Louvre missing or empty?

Why did McDonald's stop delivering?

~~Does your buildings outside paneling move to reflect sunlught into lake to warm it?~~

~~Mine most certanly does elon darling. .~~

Wristwatch lights up and begins vibrating, Molly is seen on the small holographic screen.

Molly: Its time for your meeting with Tito.

Jim nods his head. Black out.

INT. Jim’s Apartment – Night

Jim walks in to find Florian getting dressed.

Florian: I took Molly’s advice and grabbed a bath.

Jim: You ready?

Florian: Looks up at Jim from the chair hes seated in strapping his boots on.

“lets roll”

Jim and Florian head over to the dirigible and get in.

INT. 2 passenger dirigible – Inside Jim’s Apartment

Jim Fires up the machine. Lights activate, screens activate, center console is illuminated with soft irridescent glows off of the white high gloss molded interior of the small airship as screen comes on molly is there in a flight suit. Ionic thrusters activate as Jim Grasps the flight controls and as he squeezes the handles the garage begins to retract around them and the mini luxury dirigible. The floor retracts under them as the walls and ceiling mechanicaly retract back towards the apartment

the inner workings can be seen. The floor of the garage folds up and the raised portion creates ann outer wall comes up and seals the area between the apartment and the outside. They are 1800 feet above ground level floating on a pillow of Heated gasses with ionic thruster assistance. The thrusters can be seen as linear strips around the periferal of the vehicle and are stacked upon each other in the rear of the vehicle, the thrusters on either side of the split cell dirigible are for forward motion.

Jim hits the accelerat

Cut to periferl wide angle shot of the dirigible turning towards camera and flying and the three fly off as seen from an exterior wide angle shot.

INT- Dirigible – flying between buildings , scenes in background of upper levels lighted up.

Florian: No time like the present,

Jim: Whats that mean?

Florian: I got a call while you were up on the rooftop.

Jim: Oh yea, what about?

Florian: Smiles modestly. What about. , about what tito is expecting.

Jim: Yeah. He wants half.

Florian: I told him we would speak later. He wants half because your buddy James got involved.

Jim: James? The stock broker? My friend James?

JIM turns abruptly strait down as he depressurizes the air cells and heat and fire blow out of the pressure valves. Florian holds his seat slightly

Florian: Ii knew you would love that one.

End Scene.

15 minutes later

INT. TITO'S SPORT ARENA- Far side of ohm- Night

Shot of Jim and Florian entering the restaurant. Women are scantily clad in cocktail outfits. James and his crew are at a large table with Tito and a few of his associates. James notices Jim and Florian above the loud party that is happening att the steak house.

James: There they are! He yells in his burly trading floor voice that booms without the aid of a speaker system.

Jim and Florian continue their walk over to the table situated in front of the floor to ceiling windows overlooking the race course.

James: Ii knew it,,, I knew you two would be happy to see me here.

Didn't I tell yaa Kristie!! they're happy to see us.

Kristie chuckles at James's amazing perception of reality, and runs up and hugs Jim and kisses Florian on the cheek.

Tito: (smiling at Jim and Florian) : Ii told you I had other interests and partners. Heres one of them I do business with from time to time.

James yells to the cocktail waitress to bring 2 more bottles of champaign.

James: Did you really think this deal was going down without me?

City of Ohm,

Rooftop industrial apartment of a rich sicko. Mostly machine parts , elevator equipment , and other industrial parts of the antenna array module resting atop the skyscraper high above the superstructure city.

Night. Interior industrial penthouse for sickos.

The walls are form released concrete in light Grey's and light coming through the industrial skyscraper vents and antennas is reflecting blue intermittently between shadows of blackness . The halls and passageways in this sicko penthouse are not your average dimensions and the owner retains a socio minimalist furniture collection being a child's mattress on the floor , chains attached to various metal parts by welding and various types of shackles can be see on a meter high ventilator duct that is used as a sicko shelving system. Their is also located in the cozy nook adjacent to the built in shelving system what seems to be some type of stainless steel laboratory equipment housing turned upside down on the floor contains what seems to be water, unsure of the use if for drinking or other sicko recreational activity.

The one small white torn socio sheet on the child's sized mattress in the cozy nook is arranged as if it was held and squeezed as it was pulled one last time and then left with the crumpled part and the other fanned out on both ends.

As if during killing.

The light grey walls have bright red stencils paint signs sprayed for mechanical instructions for workers , with bright red writing.

One of the last guests blonde short wig or is that her scalped hair from her head with blood dried is located on top of the pipes by the floor drain. Very bad people.

The sicko penthouse smells of acids and decomposition of flesh, the fluids and parts will be flushed when homogenized.

|00k 0f dried b|00d 0n sheet in finger c|aw marks,

The electromechanical smells mix with Theodores friends and work awaken the olfactory responses between the fresh air blown through the mechanical penthouse.

Actor walks up metal industrial antenna stairs to a higher level in his sicko garden. This loft style industrial space features metal loops embedded into the concrete and weather worn wall, the corner by the exterior doubles as a place tmfor its owner to piss and ejaculate, and has a Walkman.

The light azure reflection is greyed and silvered by the rooftop metals and antenna coloring before it reaches the interior space. A large red waterpipe for deluge runs horizontal 3 feet or so above the wall .

The other walls , rooms and passages are not shown

Jupiter, the God of Gods

"Upon the throne of endless might,
Where lightning's spark ignites the night,
Jupiter, the ruler grand,
Holds the heavens in his hand.

With eyes that pierce through time and space,
He reigns above the regal grace,
His thunder roars, the skies obey,
The king of gods, the light of day.

Beneath his gaze, the world aligns,
In harmony, his power shines,
A symbol of eternal reign,
In tempest's heart, in sun's bright gain.

From lofty heights, he guards the skies,
With wisdom vast, with watchful eyes,
Jupiter, the god of gods,
The universe his grand applause
